1943 Wartime **CATALOGUE**

This Catalogue Cancels all previous Issues.

Owing to the advent of a Nurserymen's Award, all prices show an advance of last season.

At time of compiling this season's Catalogue it appears there will be a shortage of many lines, which we usually have to import from the South and are now unprocurable.

—:o:—

— TERMS OF BUSINESS —

Conditions of Sale.—I believe that all Fruit Trees, Roses, Shrubs, etc., sold by me are of the description and kind specified by me at the time of sale; but owing to the practical impossibility in many cases of being certain of this, I give no undertaking that such Fruit Trees, Roses, Shrubs, etc., will correspond with the description under which they are sold, and I make all sales subject to this condition. I further give no warranty, expressed or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms, they are at once to be returned to us and the money will be refunded. No complaint can be entertained unless made immediately on receipt of plants.

Orders.—All orders are generally executed a day or two after being received. All parcels addressed to a railway siding have to be prepaid at Bundaberg, freight should therefore be added; it is also cheaper to prepay railage. Growers who intend planting Citrus in the spring should book their orders early. It is not uncommon that booking is left till the land is ready, when very often the sorts required are sold.

Remittances.—Except when customers have an account with us, all orders must be accompanied by remittance, which should be made in postal notes or money order, cheques must have 6d. exchange added. We also send C.O.D., either by rail or post, in which case the extra cost of C.O.D. will be added.

Ordering Instructions.—To save possible errors and misunderstandings, please use Order Sheet in Catalogue, write address legibly, be sure and sign your name, as it is not uncommon to receive letters often with remittances, without name.

2. C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

TERMS OF BUSINESS—Continued.

Packing is done with utmost care; we have a trained staff and every facility in our large packing shed, and all plants, as a rule, arrive in good order.

Substitution.—To avoid disappointment, please state when ordering, if you allow substitutes or not; some varieties are bound to be out of stock as the season advances, and plain instructions will save disappointment.

Our Nursery is situated four miles from Bundaberg; the telephone line from Maryborough Road leads direct to the Nursery. Inspection is cordially invited.

All Trees offered are under the supervision of the Inspectors of the Department of Agriculture and Stock. All spraying is done regularly with a power spray, ensuing absolutely clean trees.

Despatch.—If not expressly stated we forward all parcels under 28 lb. by passenger or mail train; there are two rates, "prepaid" and "to pay". The latter costs 25 % more, but this does not apply to plants sent as goods by goods train, so customers are requested to enclose cost of railage by mail train when ordering.

Executing Orders.—All orders are usually executed promptly on receipt, forwarding for the proper railway days for the various railway lines, and avoiding arrival of plants over Sunday.

Special Propagation.—We are prepared at all times to propagate trees for clients from seedlings or selected strains; in every orchard there are some trees better than others. We are budding Citrus from January till April. Cut firm, well ripened wood of current season's growth, and remove all leaves, and wrap in moist hay.

Cost of Freight.—No hard and fast rule can be laid down as to the cost of say, 12 Fruit Trees. Trees vary in size and weight, and the exact cost will not be known till trees are packed. 12 Fruit Trees weigh from 14 lb. to 28 lb., and the freight depends then on the mileage.

Perm-O-Tags

UNPROCURABLE FOR THE DURATION

Failure of Roses and Citrus Trees.

Owing to lack of experience or indifferent preparation of soil, a small proportion of growers sometimes report lack of success.

The failures may be traced to some of the following causes:—

Allowing roots to dry out after unpacking. To not tramping or firming the roots when planting, use the feet good and hard.

The common mistake of putting fresh stable manure or fertiliser in contact with the roots when planting.

Acid soil, due to not liming sour ground. Lack of drainage causing sodden soil conditions.

Overwatering, especially on soils that are not usually well drained, twice a week is usually enough for young trees. The soil should be lightly removed around the plant; soak well, and replace dry soil.

It is inadvisable to plant Roses in ground that grew Roses before without renewing the soil first.

Lack of cultivation after planting is another cause of failure, so is planting too high or too deep. The union of the bud and stock should be one or two inches below the soil.

Excessive animal manure, causing sourness.

Very often the nursery man is blamed for these faults, but it should be remembered that after the season is over, the balance of unsold roses is transplanted under the worst conditions, with hardly any loss. This clearly demonstrates that the fault does not lie with the plant as a rule.

Late plantings of roses are always more successful than early plantings.

Rose Culture in Brief.

All Roses are expertly packed and arrive as a rule in first-class condition, no matter the distance. It is essential that the roots are kept moist and well protected after unpacking the parcel; exposure to air and sun are sure to cause losses.

4. C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

SOIL: Roses will grow in almost any soil, a medium deep loam will suit them best. Light soil may be improved by a liberal application of cow manure, and heavy soil by the application of stable manure or ashes. Extra heavy soil requires the addition of some manure, leaf mould, and lime. The poor sandy soil that is found in so many Bundaberg gardens is best improved by trenching and mixing a load or two of red scrub soil with the sandy soil.

SITUATION: Roses should preferably be planted in a bed by themselves where they can get plenty of sun; shady and protected positions encourage the growth of mildew and black spot.

PLANTING : It will be found best to plant with the union of the bud and stock one or two inches below the soil, spread the roots well out, fill the hole half up with fine soil, then tramp well down and water thoroughly. When this has drained away, fill the hole with dry soil; it is not necessary to water every night, but when watering, the soil should be taken away a little around the plant, well soaked, and the dry soil replaced. Remember, cultivation without watering will do more good than watering without cultivation. Always work up the bed after watering; this will conserve the moisture in the ground and the loose soil on top prevents that moisture from escaping. There is no need for a heavy hoe to loosen the soil, a light fork hoe can be worked by a lady. If, for some cause, a few days after planting the rose plant appears to be shrivelling, cut the stem back about three inches, then cover completely over with moist soil for three days, after which the plant will usually be found to have recovered.

MANURING: Good cow manure is considered the best, but as this is not always available, chemical fertilisers will have to be used. Specially prepared fertilisers are usually put up in small packages. This should be applied at least a month or longer after planting.

PREPARATION OF GROUND: As a rule it is not necessary to trench the bed as roses are surface feeders; where necessary drainage will be of advantage. To put stones, tins, etc., at the bottom of the plant holes is worse than useless, as it only serves as a reservoir for water to accumulate.

WATERING: This is best done by scooping out a saucer-like depression around the stems and soak the plant well, afterwards filling in the dry soil. Do this once or twice a week.

SPRAYING: Roses are of course, subject to disease, the most common of which is mildew, the leaves showing a whitish frost-like appearance. Prevention is easier than cure. Lime and sulphur solution sprayed once a month is a good preventive, and will keep the plants also free from scale, and if a nicotine preparation, such as Black Leaf 40 is added, will kill any aphids. Where the stem of the roses are covered with white scale, a painting with lime and sulphur solution will be found beneficial.

Tea and Hybrid Tea Roses

—:o:—

SPECIAL NOTICE.

STOCK.—All our Roses are now grafted on Rosa Multiflora, this stock has proved very successful. For this season we have again over 50,000 Roses ready for sale, all first class plants, free from dieback and disease.

PLANTING TIME.—My Roses are ready to send out in May, but for the far North June-July plantings are best.

Roses are bound to be in short supply this season and planters should not leave ordering too long.

SUBSTITUTES.—As the season advances, the stock of some varieties of Roses must be exhausted; in which case I shall take the liberty of making up the number required with other good sorts, unless I receive instructions to the contrary.

1/3 EACH; 13/6 DOZEN. CASH WITH ORDER.

Approximate railage and postage of Roses :

- 1 to 3 plants by rail 1/-; by parcel post 1/3.
- 4 to 6 plants by rail 1/6; by parcel post 2/-.
- 7 to 9 plants by rail 2/-; by parcel post 2/6.
- 10 to 12 plants by rail 2/6; by parcel post 2/9.

Postage or Railage should always be added. It is 25 per cent. cheaper to prepay Railage at the sender's Station.

* The varieties marked with a star are especially recommended as being most suitable for general purposes.

H.T. means Hybrid Tea; it is the most suitable rose for Queensland conditions.

T. means Tea Scented, with a glossy foliage, but not so hardy and more tender for frost.

Pern. means Pernetian, usually the finest colour combination, but subject to die back and black spot.

ALEXANDER HILL GRAY (H.T.).—Lemon Yellow, large, pointed centre, strong growing variety.

AMALIA YOUNG (H.T.).—Large, full red blooms of vigorous growth and sweetly scented.

AMBASSADOR (H.T.).—A Salmon pink, sport of Talisman, with orange base.

AMERICA (H.T.).—Rose pink, large, good form, fragrant and free.

ANTONY REVOIRE (H.T.).—Pale rosy flesh, deeper in centre, Camelia shape, mildew proof.

AROMA (H.T.).—Bright red flowers, semi double of sweet fragrance.

BARCELONA (H.T.).—Strong bushy growth, pointed buds, large and full, colour deep carmine.

BILLY BOILER (H.T.).—An Australian rose, semi-double, good bloomer, of a red colour.

BETTY UPRITEHARD (H.T.).—Semi-double blooms, inner petals salmon carmine, coppery carmine reverse; good grower.

6. C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

- BETTER TIMES (H.T.)**.—A sport of Columbia, beautiful glistening cerise and red, well formed and good grower, few thorns.
- * **CATHRINE KORDES (H.T.)**.—Rich Scarlet with crimson shades, buds long and pointed; good grower. One of the very best.
- CAPTAIN BLIGH (H.T.)**.—New Austr. Rose, long pointed buds, full double blooms, silvery rose inside, carmine reverse. 1/6
- CHIEFTAIN (H.T.)**.—Large shapely blooms, colour bright red, long, strong stems.
- CLOVELLY (H.T.)**.—Rich carmine rose, shaded salmon, long stem, semi double blooms; good garden rose.
- * **COLUMBIA (H.T.)**.—Rich deep pink, large full flowers on erect stems, almost thornless, recommended.
- COMTESSE VANDAL (H.T.)**.—Coppery salmon, semi-double flowers, good grower and bloomer, a fine variety.
- CONTESSA DE SASTAGO (Pern.)**.—A striking colour, being coppery red inside and golden yellow outside; strong grower.
- CONTRAST (H.T.)**.—Long buds opening to double flowers china pink and bronze on the inner face, white and bronze on reverse of petals.
- * **CRIMSON GLORY (H.T.)**.—Large crimson flowers, well formed vigorous and spreading. One of the best.
- * **DAILY MAIL SCENTED (H.T.)**.—Rich, velvety crimson, large and free flowering, fragrant.
- DIANNA ALLEN (H.T.)**.—New Australian Rose, unique in style and everblooming qualities, every shoot carries flowers resembling small carnation of beautiful rosy pink shading to salmon pink with yellow base.
- DICKSONS BOUGUET (H.T.)**.—An Ophelia type of blossom with richer colourings of salmon and apricot.
- DON BRADMAN (H.T.)**.—Beautiful double pink rose, veined carman, erect stem, large bloom.
- * **DOROTHY PAGE ROBERTS (H.T.)**.—Coppery Pink, Suffused Apricot, mildew proof.
- * **EDITOR McFARLAND (H.T.)**.—Erect, vigorous growth, Dark Green Foliage, colour Bright Rose, Shaded Salmon, one of the best.
- * **EFFECT (H.T.)**.—Novelty. A fine grower and good bloomer; dark red inside flower, outside golden yellow.
- ELIZABETH OF YORK (H.T.)**.—A very fine garden rose, strong growth, colour rich cerise pink, semi-double; recommended.
- * **ELI KNAB (H.T.)**.—Deep rosy pink, heavily veined, double.
- ELEGANTE (T.)**.—Sulphur yellow, long buds and mildew proof foliage.
- * **ELI HARTMAN (H.T.)**.—Old Golden Yellow, vigorous, mildew proof foliage; recommended.
- * **E. G. HILL (H.T.)**.—Glowing Scarlet, very free and of good form, flowers produced on long stem.
- EILEEN DOROTHEA (H.T.)**.—Colour Rich Carmine Pink, buds long and pointed, good growth, double.
- E. J. MOLLER (H.T.)**.—A Queensland Variety; colour Red, deepening to Black; full and free.
- * **ETOILE DE FRANCE (H.T.)**.—Velvety Crimson, a little darker than Laurent Carle.
- * **ETOILE DE HOLLAND (H.T.)**.—Dark Red, very fragrant, double to semi double, Dark Green Foliage, mildew proof, one of the best.

- ETERNAL YOUTH (H.T.)**—Extra large double flowers, light pink, heavily suffused orange salmon, born on long stems, good foliage.
- ECLIPSE (H.T.)**—Deep golden buds, large and long pointed, opening into semi-double flower of cadmium yellow.
- EVERT VAN DYK (H.T.)**—Clear carmine, pink flowers, full and large. Good grower, does well.
- FACKEL (H.T.)**—Well formed, pointed bud, opening to double flower of crimson red, shaded black, fragrant and vigorous.
- * FASCINATION (H.T.)**—Rose Cerise, Shaded Yellow, good shape and strong grower: recommended.
- FEU-PERNET DOUCHER (H.T.)**—Creamy flower, and very full, medium rose, stiff stems and good growth.
- FRANCIS SCOTT KEY (H.T.)**—Large and very full rose of deep cherry colour on erect stems.
- FRAU KARL DRUSCHKI (H.T.)**—Snowy white, the largest White Rose and a rank grower, the long canes should be horizontally pegged down, which will produce a mass of flowers.
- FRITZ HOGER (H.T.)**—Large long pointed buds, opening to double flower of pure crimson: growth upright and healthy.
- GENERAL SUPERIOR JANSEN (H.T.)**—Glowing deep carmine, very free and strong grower.
- GEO. DICKSON (H.T.)**—Velvety black crimson, and a rank grower, with long conies. Flowers mostly in Spring.
- GEORGE SCHWARTZ (H.T.)**—Canary Yellow; buds long and pointed; semi-double.
- GLADYS HOLLAND (H.T.)**—Buff shaded orange. Full and free flowering.
- * GOLDEN DAWN (H.T.)**—A native of Australia; very vigorous; colour, rich sunflower yellow; heavily flushed deep old rose. Highly recommended.
- * GOLDEN TALISMAN (H.T.)**—A sport of Talisman with more petals, even, yellow colour, blooms large and double.
- * GOLDEN OPHELIA (H.T.)**—Golden yellow, shading brighter at the edges; good shape. Recommended.
- * GRANAT (H.T.)**—Velvety black-red buds, good flowers of blackish red, vigorous growth and profuse bloomer. Recommended.
- GRACE MOLINEAUX (H.T.)**—Creamy Apricot; sweet perfume; good grower.
- GRENOBLE (H.T.)**—A vigorous, mildew-proof rose, double, scarlet red.
- GIPSY LASS (H.T.)**—Rich scarlet flowers; full, and of medium size.
- * HADLEY (H.T.)**—Dark red; large and full, very fine bloom. A first class rose and recommended.
- * HILDA (H.T.)**—Deep pink; full blooms and growth good.
- * HOOSIER BEAUTY (H.T.)**—Glowing crimson with darker shadings; free, large and full.
- * HUGO ROLLER (H.T.)**—Lemon yellow; edge, crimson; very much like Penelope, but mildew proof.
- * J. L. MOCK (H.T.)**—Carmine and Imperial pink; large double flowers on long stems. Recommended.
- JULIEN POTIN (Pern.)**—Long shapely buds developing into large flowers; colour, rich golden yellow.
- J. C. THORNTON (H.T.)**—A fine bloom of crimson scarlet, very vigorous.

8. C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

- *K. A. VICTORIA (H.T.).**—Pure white; an old favourite for garden and exhibition. One of the best white.
- KOENIGIN LOUISE (H.T.).**—Clear white; large and well formed. Lasting well.
- *KOOTENEY (H.T.).**—Creamy white; large full blooms. A vigorous grower. Recommended.
- *KOROVO (H.T.).**—Clear salmon pink, double blooms, free flowering and of good form. Recommended.
- KURT SCHOLZ (H.T.).**—Long and pointed bud opening into a large bloom, colour crimson scarlet.
- LADY CAHN (H.T.).**—Long buds, opening to full flowers of apricot yellow; growth vigorous and healthy.
- LADY COVENTRY (H.T.).**—Vermillion shaded blue; large and handsome.
- LADY HELEN MAGNOLA (H.T.).**—Bright Crimson; dark markings; sweetly scented; semi-double.
- *LADY HILLINGDON (T.).**—Orange yellow; buds long and pointed. Free flowering.
- LADY HUNTINGFIELD (H.T.).**—Rich, deep yellow blooms, produced freely on long stems with healthy foliage.
- LADY ROBERTS (T.).**—Reddish Apricot; good shape; bushy growth; mildew proof foliage.
- LADY URSULA (H.T.).**—Flesh Pink; very free flowering and healthy grower.
- *LAURENT CARLE (H.T.).**—Brilliant Velvety Carmine; one of the best for garden and exhibition. Can also be supplied as a climber; both recommended.
- LIEBESBOTE (H.T.).**—Crimson scarlet flowers; large and full, healthy growth.
- LLEIDA (H.T.).**—A fine variety with large bi-coloured blooms, outside of petals yellow at base, flushed yellow and red, inner face bright orange red.
- LORD CHARLEMONT.**—Good garden rose of clear crimson colour; full flowers; sweetly scented.
- *LUNA (H.T.).**—Colour of buds yellow, opening to pale yellow; large buds of good form.
- LUBRA (H.T.).**—Double crimson, blooms richly fragrant, strong and healthy growth.
- MABEL DREW (H.T.).**—Creamy, passing to yellow with deep green foliage, good grower.
- MABEL TURNER (H.T.).**—Large flowers; full and well formed; colour, Deep Salmon Pink.
- *MDM. ABEL CHATENEY (H.T.).**—Carmine, shaded Vermillion; very free flowering; first class rose; recommended.
- MDM. BUTTERFLY.**—Bright Pink, Apricot, and Gold; rich perfume; semi-double.
- MDM. CONSTANCE SOUPERT (T.).**—Apricot, shaded Peach; buds long and pointed.
- MDM. P. EULER (H.T.).**—Vermillion Pink; good garden rose; full and erect.
- MDM. COCHET COCHET (H.T.).**—A fine, tall growing variety of good foliage and free blooming; long pointed buds of Coppery Pink, flushed Orange.
- MADAM LOUIS LENS (H.T.).**—Strong grower, free branching, pure white and full.
- MAISON PERNET DOUCHER (Pern.).**—Colour clear orange and shaded copper, elongated buds and fully double.

- * **MATADOR (H.T.)**—An improved Etoile de Holland, with better formed and larger flowers; good colour, and highly perfumed. A very fine rose.
- * **MAMAM COCHET (H.T.)**—Flesh coloured rose; an old favourite.
- MARIE ADELAIDE GRAND DUCHESS DE LUXEMBURG (H.T.)**.
—Orange Yellow; of good form; flower carried erect; fair growth.
- * **MARIE VAN HOUTE (H.T.)**—Pale lemon yellow, edged with rose; an old favourite.
- * **MARY COUNTESS OF ILLCHESTER (H.T.)**—Warm Crimson. Carmine; full and strong grower; very free and fragrant.
- MAX KRAUSE (H.T.)**—Deep reddish orange changing to clear yellow, large full flowers on single stems.
- McGREDY'S SCARLET (H.T.)**—Flowers Rosy Cerise; full of good shape; dark green foliage; this rose does very well
- MEV. G. A. VAN ROSSEM (Pern.)**—The flowers are a shade of dark Orange and Apricot; reverse of petals is often Bronze; very striking colour.
- MRS. A. R. WADDELL (H.T.)**—Long buds of a Reddish Salmon tint; dark green foliage;
- MRS. B. R. CANT (H.T.)**—Deep Rose; very full and strong grower; well known rose.
- MRS. CHAS. J. BELL (H.T.)**—A shell pink, sport of Radiance, dainty colour, good growth.
- MRS. DUDLEY CROSS (H.T.)**—Pale chamois yellow; nearly thornless; good bloomer; mildew proof.
- * **MRS. DUNLOP BEST (H.T.)**—Reddish apricot; base, coppery yellow; sweetly scented.
- MRS. GEORGE SHAWYER (H.T.)**—Very large, well formed, full clear rose, liable to mildew.
- MARY HART (H.T.)**—A Sport from Talisman; bud, maroon red; very fine rose.
- MRS. BRYCE ALLEN (H.T.)**—Soft silvery rose, good perfume, very free.
- MRS. FOLEY HOBBS (T.)**—Ivory White, tinged Pink; and sweetly scented.
- MRS. FORDE (H.T.)**—Deep Carmine Rose; large flower and healthy grower.
- MRS. HAROLD BROCKLEBANK (H.T.)**—Creamy White; centre Buff; good grower and free flowering.
- * **MRS. HERBERT STEVENS (T.)**—White, with Fawn and Pink shadings; free flowering; semi-double; good garden rose.
- MRS. H. R. DARLINGTON**—Creamy White; good for garden or show; double blooms.
- MRS. H. WINNETT (H.T.)**—A beautiful double Red Rose; free flowering and mildew proof.
- MRS. TOM SMITH (H.T.)**—Glowing cerise; good grower; mildew proof; opens well.
- MRS. VERSCHUREN (H.T.)**—Novelty. Salmon, orange flowers on stiff stems, free flowering and vigorous.
- MRS. W. E. LENON (H.T.)**—Large, pointed buds; semi-double; colour, reddish carmine; good for Exhibition.
- MY MARYLAND (H.T.)**—Bright salmon pink; very free blooming and double blooms.
- NEDERLAND (H.T.)**—Vermillion pink; small flowers; fair growth.
- OPHELIA (H.T.)**—Salmon Flesh, shaded Rose and Yellow; fragrant, and free; semi-double.

10 C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

PEACE (T.).—Pale lemon, tinted blush; free flowering, and a strong grower.

***PENELOPE (T.).**—Cream Tipped Dark Rose; requires good soil, liable to mildew.

PERLE DES JARDIN (T.).—Straw colour; large and full.

PICTURE (H.T.).—An ideal bedding type, medium sized blooms of rose pink colour, a fine rose.

PICK ME UP (H.T.).—Shapely red rose, free bloomer. A fine rose. 2/6.

PINK PEARL.—Rose Pink, shaded Red; very free and full; strong growth.

PINK LORD TARQUIN (H.T.).—A Pink sport of the white variety, otherwise same habit.

***PRESIDENT HERBERT HOOVER (H.T.).**—Large, long, pointed buds; semi-double; outer petals, claret red; inner petals, deep salmon; very striking.

***PRESIDENT MACIA (H.T.).**—Shapely buds; colour, deep pink outside; pale flesh inside petals.

PRINCE BERNHARDT (H.T.).—Novelty, well formed red flowers, produced on strong stems, long buds, good bloomer and strong plants.

QUEENSLAND BEAUTY (H.T.).—A Pink sport of Golden Dawn. The colour is deep rose pink, opening to flesh pink,

***RADIANCE (H.T.).**—Undoubtedly the most popular pink garden rose. The colour is Silvery Pink inside, whilst the outside is soft Carmine. The flowers are double and fragrant, produced on long stems and thrives in the poorest soil; highly recommended.

***RED RADIANCE (H.T.).**—Identical to Pink Radiance, but the colour, which is Cerise Red. Has the same good points as the Pink variety, and should find a place in every garden.

***REV. F. PAGE ROBERTS (H.T.).**—Large double blooms; rich yellow colour; reverse rich Salmon, shaded Carmine and Yellow; foliage is mildew proof; likes good soil; a moderate grower.

***ROSELANDIA (H.T.).**—Large and of fine form, rich golden yellow, free, semi-double.

***ROSE MARIE (H.T.).**—Rich rose pink; very free; fragrant and mildew proof; good for garden and exhibition.

***ROUGE MALLERINE (H.T.).**—Pointed buds, brilliant red, full flower, vigorous and very fragrant.

SENSATION (H.T.).—Scarlet Crimson, Maroon markings; large double flowers; pointed buds.

***SIR HENRY SEAGRAVE (H.T.).**—Primrose yellow blooms, of good form and size; growth is good.

SHOT SILK (H.T.).—A beautiful rose; cherry cerise, overlaid with salmon orange, but a poor grower.

***SOUV. DE MARIA DE ZAYAS (H.T.).**—Deep carmine; double blooms of good substance; good for garden or exhibition; mildew proof.

SOUV. DE MDM. BOULLET (H.T.).—Rich yellow; long, pointed buds; free flowering.

***SOUV. DE ALEXANDRE BERNAIX (H.T.).**—A fine variety; upright growth; bloom large and globular; colour deep scarlet, shaded maroon.

SOUV. STELLA GRAY (T.).—Deep Orange and Salmon Crimson; semi-double; fragrant.

- * **SOUV. DE DERRIER VAN DER GON (H.T.)**—Long pointed buds carried on long, strong stems, double flowers, orange, shaded coppery red. One of the best.
- * **SOUV. DE H. A. VERSCHUREN (H.T.)**—Cadmium yellow; large and full; good form; first class rose.
- SWEETNESS (H.T.)**—Buds buff with vermillion edging creamy white, large well shaped flowers.
- STATELY (H.T.)**—Pale Flesh, deepening to Salmon; full double flowers; good form.
- STAR OF QUEENSLAND (H.T.)**—Rich velvety crimson; strong and free flowering; a well known sort.
- SUNBURST (H.T.)**—Long buds of Deep Yellow; semi-double.
- * **TALISMAN (H.T.)**—Scarlet pink, gold and coppery; a very fine colour; decorative only.
- TEXAS CENTENIAL (H.T.)**—A sport of President Herb. Hoover, blood red, toning to cerise red in centre.
- THE BRIDE**—White, sometimes tinted Rose; very much like White Mamam Cochet.
- THE DOCTOR (H.T.)**—Large buds of rich satiny pink of a pleasant shade; light green foliage, good growth. 2/6 ea.
- UNA WALLACE**—Cherry Rose, without shading; good double blooms and free flowering; sweet perfume.
- VICTORIA HARRINGTON (H.T.)**—Novelty. Very strong growing, dark red variety; blooms are on long stems and colour keeps well.
- WARRAWEE (H.T.)**—New Australian rose; extra long pointed buds of clear rosy salmon, inner face silvery pink, strong stems and of vigorous growth.
- W. C. GAUNT**—Scarlet Crimson; of a good shape; double and free flowering.
- W. E. CHAPLIN (H.T.)**—Colour Carmine Crimson; strong growth and good foliage; good sort.
- * **WHITE ENSIGN (H.T.)**—Pure white; very free flowering; first class rose.
- * **WHITE LORD TARQUIN**—White; good bloom; always in flower.
- * **WHITE MAMAM COCHET**—Creamy White; tipped Pink; should be in every garden.
- WM MOORE (H.T.)**—Large, full blooms, light pointed centre, colour carmine pink with deeper shadings. 2/6.
- WM. ORR (H.T.)**—Deep velvety crimson, flowers large and full. a good rose. 2/-.
- * **W. R. SMITH**—Creamy white, shaded pink; flowers, large and full; strong grower.
- YELLOW DRUSCHKI**—Pale Creamy Yellow; very full; good bloom.
- * **YVONNE VACHEROT**—Porcelain white, suffused soft pink; free bloomer.
- YVES DRUHEN (H.T.)**—A very Dark Velvety Red; strongly perfumed; good grower.

Polyantha Roses

(CLUSTER ROSES)

- BABY CHATEAU.**—Double flowers, deep crimson.
CECIL BRUNNER.—Rose, Yellowish centre.
CLOTHILDE SOUPERT.—Pearly White, centre Carmine.
CORAL.—A free flowering Pink variety, not unlike Our Allies.
ERNA VON TESCHENDORF.—Bright Crimson; a fine massing variety; recommended.
FAIRY PET.—Pure White.
FIREBALL.—Reddish Orange; a bright firey red.
FRANK LEDDY.—Carmine Lake; good.
FORTSCHRITT.—Hybrid Polyantha, Salmon Yellow, very free flowering, with a rich musk scent.
GARTENDIRECTOR OTTO LINNE.—Strong, bushy, showy growth, large clusters of dark rosy pink. Highly recommended.
GLOIRE DU MIDI.—Colour as Gloria Mundi, but keeps colour better.
GLORIA MUNDI.—Glowing Orange; a sport from Orleans.
GOLD LACHS.—Golden Salmon; very distinct colouring; large trusses.
HOLLANDIA.—Blood Red Rosetti-like Flowers; nice sprays.
IDEAL.—Dark Crimson; at times Scarlet.
LEONIE LAMESH.—Coppery Red.
MAD. JULES GOUCHALT.—Vermillion; shaded Orange and Red; open flowers; good.
MERVEILLE DE ROUGES.—Bright crimson, wine shade.
MISS EDITH CAVILL.—Scarlet Crimson.
ORANGE TRIUMPH.—Salmon red with orange shadings. 1/6.
ORLEANS.—Brilliant Geranium Red; White centre.
OUR ALLIES.—White, shaded Pink; a grand variety.
PAUL CRAMPEL.—Scarlet Orange colour; showy.
PERLE DE OR.—Nankeen Yellow.
RED PET.—Bright Dark Crimson.
RUFUS.—Bright red, sometimes white stripes on outer petals.
SALMON SPRAY.—Rich Salmon Pink; sweetly scented.
TIP TOP.—Golden Yellow, tipped Cerise.

Climbing Roses.

—:o:—

- PLEASE NOTE.**—Most Climbing Roses flower on matured wood, usually the second year after planting. It is therefore advisable not to prune until they have flowered.
ALLENS GOLDEN CLIMBER (H.T.)—Long shapely buds opening to rich yellow blooms with a fine tea fragrance.
AMY JOHNSON.—Named after the great lady flyer. A strong grower; good foliage; sweetly scented; of a lovely shade of Pink.

- ***AUSTRALIAN BEAUTY**.—Rich crimson; handsome foliage, and sweetly scented.
- ***BLACK BOY**.—Deep crimson; darkest climber; large blooms, and very vigorous; mildew proof foliage.
- ***Clg. COLUMBIA**.—A climbing sport of the well known Dwarf variety.
- ***Clg. DAILY MAIL SCENTED**.—A climbing sport of the Dwarf Daily Mail Scented; rich deep Velvety Red, with a Scarlet Sheen.
- Clg. DAME EDITH HELEN (Clg. Pern.)**.—Beautiful rose pink flowers, but being a pernetian will not do everywhere.
- Clg. GOLDEN DAWN (H.T.)**.—Rich sunflower yellow, heavily flushed with old rose. 1/6 each.
- ***Clg. ETOILE DE HOLLAND (H.T.)**.—A climbing sport of the well known dwarf varitety; Dark Reddish Crimson; well scented.
- Clg. FAIRY PET**.—Polyantha rose, pure white.
- Clg. GOLDLACHS POLYANTHA**.—Very free flowering: colour Fiery Goblin Salmon.
- ***Clg. HADLEY**.—A climbing sport of the well known Red Hadley Rose, a true climber; recommended.
- Clg. HOOSIER BEAUTY**.—Identical in colour to the Dwarf variety, which is a glowing crimson, with dark shadings.
- ***Clg. LAURENT CARLE**.—A strong growing climbing sport of the popular Laurent Carle. It is free flowering and mildew proof; recommended.
- Clg. MATADOR (H.T.)**.—A sport of he fine dwarf variety, dark red, very fragrant, excellent bloom. 2/6.
- ***Clg. MDM. ABEL CHATENEY**.—A climbing sport of the well known Dwarf variety.
- ***Clg. MAD. ISAAC PIERRE**.—Deep Coral Pink; free flowering and and a good grower.
- Clg. MDM. LOUIS LENS (H.T.)**.—Extra long pointed double white blooms of high standard. 1/6.
- Clg. MADAM SEGOND WEBER**.—Rosy Salmon; vigorous; full double bloom.
- ***Clg. MAMAN COCHET**.—Flesh coloured rose.
- ***Clg. MRS. HERB. STEPHENS**.—Large, fairly full, snow white flower; a sport from Mrs. Herb Stephens; true climber.
- MRS. PAUL J. HOWARD (H.T.)**.—Large double, fragrant crimson blooms on long stems, vigorous growth, dark green foliage. 2/6 each.
- Clg. OPHELIA**.—Genuine climbing habit; colour Salmon, Flesh shaded Rose, and Yellow; scented.
- Clg. PENELOPE**.—A climbing sport of Penelope; with its Crimson outer petals and Creamy centre.
- Clg. PRESIDENT HERBERT HOOVER (H.T.)**.—Large, semi-double flowers of Orange and Red, and a welcome addition to the strong growing climbers.
- Clg. PROSPERITY (Hybrid Musk)**.—Perpetual flowering rose, white, tinted pink.
- ***Clg. RADIANCE**.—Has the same good points of the Dwarf variety; and is well worth planting.
- ***Clg. RED RADIANCE**.—Same as Radiance, only difference in colour.
- Clg. ROSEMARY (H.T.)**.—A new climbing variety; colour Peach Pink; well shaped blooms; fragrant; mildew proof foliage.
- ***Clg. SUNBURST**.—A strong climbing sport with long shapely buds of deep yellow; free bloomer.

14 C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

- Clg. SOUV DE MDM BOULLETT (H.T.).**—Rich deep Cadmium Yellow, long buds and good foliage, recommended.
- Clg. TALISMAN (H.T.).**—A climbing sport of the popular dwarf variety, producing flowers identical to the parent
- Clg. SOUV DE LA MALMAISON.**—A well known old variety; Flesh Pink; strong grower.
- Clg. MEV. G. A. VAN ROSSEM (Pern.)**—A distinct colour amongst climbers, rich orange, apricot and yellow blooms.
- *Clg. WHITE MAMAN COCHET.**—Colour same as Dwarf.
- Clg. WHITE LORD TARQUIN.**—A free flowering sport of the well known Dwarf variety; good grower.
- *CLOTH OF GOLD.**—Pale yellow; strong grower.
- CRIMSON RAMBLER.**—Bright Scarlet; double flowers produced in clusters.
- *GOLDEN VISION.**—Golden yellow flower; bright green foliage; strong grower.
- HAMBURG Clg. POLYANTHA.**—Large bushes of scarlet red flowers.
- *LA MARQUE.**—A well known white climbing rose; flowers are in clusters.
- MAD. DRIOUT.**—Red and White; a striped variety; strong grower.
- MARSCHAL NEIL.**—Deep Golden Yellow; a well known sort.
- *MISS MARION MANIFOLD.**—Rich velvety scarlet; a valuable double rose; free flowering.
- REV. T. C. COLE.**—A Yellow climber; flowers small, but full.
- SACHSENGRUSS.**—A nearly thornless climber; Flesh coloured and as big as Frau K. Druschki in size.
- WHITE BANKSIA.**—White Cluster; shiny foliage.
- WAR PAINT (H.T.).**—Large flowers of bright carmine rose, growth healthy.

Citrus Fruit Trees.

All A Grade Trees are propagated from buds supplied by the Government, ensuring of only the best strains being propagated.

Root Stock.—All seed required for root stock is now supplied by the Government, especially selected for this purpose.

Soil.—Citrus Trees may be grown in many soils, but to be successful on a commercial scale it is essential that the soil be of a sandy loam, deep, free, and well drained, as level as possible. Freedom from severe frosts and high winds is necessary for best results.

Time to Plant.—Citrus Trees can be planted almost all the year round; on the coast, from February to September is the best time; for frosty conditions, early in the Autumn or in the Spring, August-September are most favoured.

Planting Distance.—From 20 to 25 feet is usually observed.

Planting the Trees.—In removing the young trees from the nursery a number of roots are more or less injured. The roots of the young tree should therefore be carefully examined before planting, and any broken or crossing roots removed by means of a sharp knife, making the cut on the under side of the root, so that the cut surface comes in contact with the soil when the tree is planted. Mark off the land in squares or hexagons, 20 to 25 or 30 feet apart each way; 25 feet is about the best distance for worked trees. The digging of the holes is a simple job, as all that is necessary is to take out sufficient soil to enable the tree to be set at the same depth at which it stood in the nursery row, and with room enough to spread the roots evenly. The bottom of the hole should be like an inverted saucer, the centre of the hole being slightly higher than the sides, so that the roots when spread out will have a downward tendency, and thus go deeper into the soil. When the tree has been planted correctly in the hole, scatter fine top soil around the roots, and see that they come into direct contact with it; if not, the tree will dry out; but if the roots are in direct contact with the soil they will make new roots quickly, and soon start new growth. If the weather is very dry at the time of planting, give each tree a kerosene tin full of water at this stage of the planting, and when it has soaked in, fill up the hole with loose soil. If this is done, the young tree will get a good start, no matter how dry the surrounding soil is.

What to Plant.—Do not attempt to grow too many varieties, but stick to those of proved value. In the case of oranges, three good kinds are ample, and where Navels do well they should be grown extensively on account of their ripening early. Joppa is a good all round early and medium ripening fruit, and one of the best late fruits is Valencia Late. In mandarins, the old standard sorts, such as the Emperor, Solid Scarlet, Scarlet, and Beauty of Glen Retreat, should be planted extensively. In Lemons, Lisbon, and Villa Franca, are the best; in Limes, Tahiti and Grape Fruit Marsh's.

Manuring.—Any good farmyard manure is beneficial, but as this is not always available, green manuring then gives the best results. To grow these, a fertiliser containing a large amount of superphosphates should not be omitted.

Failures.—It sometimes happens that trees refuse to grow, or die off. If trees arrive in good condition, it is possible to get them established with little loss. Should this, however, be followed by heavy frosts, drought, or scorching winds, some of the trees may succumb, in which case it is through no fault of ours, but the result of adverse circumstances.

Thin Skinned Fruit.—This is entirely a matter of soil, climate, and manure. Citrus planted in black soil or rich scrub, develop a much thicker skin than those planted in light sandy loam. Heavy nitrongenous manuring also puts thick skin on, so have young vigorous trees. The older trees produce the finest fruit; that does not mean however that old trees should be planted, young but strong trees are best.

Stock.—We have 50,000 strong, well grown Citrus Trees for sale this season, all are staked trees, well grown and free from disease.

Grafted Citrus Trees bear usually the second year after planting, provided they are well looked after.

Please Note: Packing Charges on Fruit Trees will be as follows:—

Not exceeding 6 Trees .. 9d.
Not exceeding 12 Trees .. 1/3.
Not exceeding 25 Trees .. 1/6.

Larger bundles packed in hessian or cases at cost price.

Hessian is very scarce and dear.

PLEASE NOTE: Under a new law it is compulsory for every Nurseryman to sell Citrus Trees under two groups. "A" Grade trees shall consist of trees which have been grafted with scions selected under the supervision of an Inspector from vigorous trees, free from disease and bearing large crops of fruit characteristic in all respects of the variety.

PLEASE NOTE: Less than six trees of any one variety charged at 2/-, and over six and under 50 of any one variety charged at dozen rate; 50 and over of one variety charged at 100 rate.

**ALL CITRUS TREES ARE PRICED : 2/3 each; 25/- doz.;
£8/-/- per 100.**

(Varieties with an Asterick are A GRADE TREES)

—:o:—

ORANGES

2/3 each; 25/- doz.! £8/-/- per 100

Orange Trees are very scarce this Season and we cannot accept Orders for 50 or more of one variety, until February, 1944.

- ***JAFFA.**—Oval, large size, smooth skin, nearly seedless.
- ***JOPPA.**—Slightly rounded, oblong, fine grained and rich flavour.
- ***WASHINGTON NAVEL.**—Large size and excellent quality, fruit will set better if irrigated in spring; earliest.
- ***VALENCIA LATE.**—Medium size, very juicy, late.
- ***WHITE SILETTA.**—Pale orange colour, smooth rind, few seeds.
- GOLDEN NUGGET NAVEL.**—Smooth and solid, pendulous habit of growth, not a big grower.
- NAVELEMIA**—Cross between a Oalumia and Washington Navel. Ripens early.
- PAPER RIND NAVEL.**—Very early, thin skin, suitable for home use.
- ***MEDITERRANEAN.**—Sweet, early, heavy cropper, liable to split

ST. MICHAEL.—A large early variety, good bearer and suitable for market.

SURPRISE NAVEL.—Medium, roundish, rich flavour and seedless.

RUBY BLOOD.—Medium and sweet, skin reddish yellow, but shows little blood under Queensland conditions.

SEVILLE.—Bitter orange for preserving.

MANDARINS.

2/3 each; 25/- doz.! £8/-/- per 100

***BEAUTY OF GLEN RETREAT.**—Form oblate, rind smooth and glossy, very juicy and few seeds.

***EMPEROR (Emperor of Canton).**—Firm roundish skin, yellow, skin medium to thick, good flavour, few seeds.

***SCARLET.**—Flat and of medium size, rind rough and thin, juicy and sweet.

* **SOLID SCARLET.**—Large size, very fine flavour and preferred by grower to the ordinary scarlet.

CLEMENTINE.—A Hybrid between an orange and a mandarin, hardy, matures early, delicate spicy flavour.

ELLEDALE BEAUTY.—Very large, yellow flatish, very smooth, hangs well, late.

KING OF SIAM.—Very large, yellow, rough skin, prolific.

PRIDE OF ELLEDALE.—A very large Mandarin with a thin skin, very sweet and good flavour.

OON SHIU (Satsuma).—Large, greenish yellow, dwarf, pendulous habit.

FEWTRELL'S EARLY.—A cross between an orange and mandarin, large, yellow, very prolific.

RICHARD'S SPECIAL.—Extra large, late; fruit should be left on tree as long as possible to get the best flavour.

THORNY.—Medium, very highly flavoured, good bearer, wood requires thinning.

GOLDEN SURPRISE.—A seedling of the Emperor variety, thin skin. In flavour a combination of Mandarin and Grapefruit, which makes the fruit most palatable and not at all sour, late and thornless. 3/-.

LEMONS.

2/3 each; 25/- doz.! £8/-/- per 100

***LISBON.**—Form, oblong, medium size; thorny, prolific.

***VILLA FRANCA.**—Oval form, medium to large, good flavour, summer bearing, thornless.

GENOA.—Oblong, pointed at both ends; thornless and dwarf habit.

EUREKA.—Sweet rind, medium, few seeds and early bearer.

COMMON OR BUSH LEMON.—1/3 each.

Please Note.—All varieties of Lemons even thornless sorts, often have thorns as young trees, but soon get thornless when older.

CITRONS.

2/3 each; 25/- doz.

AMERICANA.—Pear shaped and the colour of a lemon; far superior to any other kind; enormous bearer; no household should be without this tree; makes the finest jam.

CUMQUATS.

2/3 each; 25/- doz.

ROUND.—Small, yellow; hardy variety.

NAGONNI OVAL.—A sweet variety, the skin of which is eatable.

TANGELOS.

2/3 each.

A cross of the Mandarin and a Pomelo, retaining the best qualities of their parents. Easily grown and early bearer.

SAMPSON.—Medium size, round, golden yellow colour, early, should not be picked till sweet.

GRAPE FRUIT.

(Edible Pomelo)

2/3 each; 25/- doz. £8/-/- per 100

The varieties offered are the true type Grape Fruit. These are becoming popular now as a breakfast appetiser. Of a peculiar bitter sweet flavour, it is recognised as the most beneficial of all fruit juices for improving the digestion.

***MARSH.**—Seedless, colour pale lemon yellow, thick rind.

FOSTER.—Flesh large; good bearer; seedy; rose pink flesh.

MacCARTHY.—Large yellow; late; fruit is borne singly; prolific.

TRIUMPH.—Medium size; peel smooth and thin; few seeds; well flavoured.

NUTSU MIKAN.—Japanese Grape Fruit; orange colour; large fruit; very juicy; makes a fine drink.

LIMES.

2/3 each; 25/- doz.

TAHITIAN.—Strong grower; thin rind and heavy bearer.

—:0:—

AVOCADOS

A thrilling new taste experience awaits you.

If you have never tasted an Avocados you have a delightful surprise in store! This smartest of salad fruits is deliciously unlike any other fruit in flavour. It has a consistency strange to fruits—a melting goodness. A properly softened Avocados may be cut and partly used. The unused portion left in the skin will keep in your refrigerator. It is advisable to lay wax paper over the cut surface. Also, care should be taken not to place the fruit directly on the ice or too close to freezing units. If the fruit is not too soft, any small discoloured parts may be cut away. The rest of the fruit will be fresh and wholesome.

FOR HEALTH REASONS.

Dietitians commend the Avocados because it stores its food as a highly nutritive fruit oil. It has the energy value of lean meat, is to digest, and supplies minerals, protiens and vitamins essential to health. Thus growing children can be given Avocados liberally. They make an ideal luncheon in themselves—satisfying, energizing, yet “light”.

Serve Avocados often—as something smart and unusual for “important” dinners, luncheons and teas—or a delicious surprise for the family.

ALL GRAFTED AVOCADOS SOLD OUT.

ONLY SEEDLINGS LEFT—2/6 each.

A lovely evergreen fruit tree, fruit is large and pear-shaped with a thick leathery skin, weighing over a pound each. The fruit in California, where it is grown in enormous quantity, is used mostly for salads. Being rich in Vitamins it is a valuable food.

The tree is very ornamental and should be planted for this reason alone.

Every tree is sold with a ball of soil and must be well looked after until established; shading, mulching and watering are essential.

Avocados will thrive in climates suitable for Citrus Trees and require the same well drained soil, but dislike too much cultivation, grass should be cut and allowed to rot. Trees usually bear in 2 to 4 years after planting.

Please Note.—Avocados are again in short supply and are usually sold out by July.

Grafted Trees 7/6 each.

COONAR BEAUTY.—Fruit similar to Dickinson and a special heavy bearer, fruit nearly black.

GRANDE.—Oval shaped, deep green. 3½ins in diameter; ripens May-June; heavy bearer.

LINDA.—The largest Avocado grown. Average 2lb. each fruit. Round with a rough purple skin.

SPINKS.—Purple, large fruit, fine eatnig.

QUEEN.—Large pear shaped fruit, 1½lb.; purplish maroon skin, fine quality, good bearer.

SEEDLING AVOCADO—2/6 Out of pots.

CUSTARD APPLES

(CHERIMOYER)

GRAFTED TREES

Plant July till September

3/6 each; 36/- dozen. £12/-/- per 100 plus packing.

We are the largest growers of Grafted Custard Apple Trees in Queensland, and can offer you the best trees.

The notes appearing under the citrus culture are also applicable to Custard Apples, with the exception that they can only be successfully grown on a commercial basis in the coastal belt of Queensland where the frost is not too heavy. Grafted Custard Apple trees have few seeds and are in every way superior to seedlings.

NOTE: Custard Apples can only be successfully transplanted from July till September; or sometimes October.

QUEENSLAND A.S. SPECIAL.—Of medium size and fine flavour.

PINK'S MAMMOTH.—Extra large; with few seeds.

—:o:—

APPLES

1/9 each; 18/- dozen.

Abbreviations: K. denotes Kitchen; D. denotes Dessert.

GRANNY SMITH, K.D.—Greenish yellow; late.

JONATHAN, D.—Striped red; good bearer.

DELICIOUS, D.—Handsome fruit; good keeper.

ALMONDS

1/9 each.

Suitable for Dry Climate Only.

BRANDE'S JORDAN.—Strong grower.
NONPARIEL.—Heavy bearer; thin shell.
PAPER SHELL.—Very good.

APRICOTS

Only Suitable for the Cooler Parts

1/9 each.

NEWCASTLE.—Medium, Yellow, Red Cheek; good bearer.
TILTON.—Large, Golden Yellow; prolific.
TREVATT.—Yellow, Rich; good cropper.

FIGS

1/9 each; 18/- dozen.

BROWN TURKEY.—Large fruit; heavy bearer.
WHITE ADRIATIC.—Strong grower; and fine flavour.

LOQUATS

Grafted, 2/6 Each

UNPROCURABLE.

MULBERRIES

1/9 each.

DOWNING'S EVERBEARING.—Large fruit; juicy; suitable for local use.
HICKS.—Large black; very prolific.

NECTARINES

For Cool Climate

1/9 each.

GOLD MINE.—Enormous fruit; juicy; bronze red.
HUNT'S TAWNY.—Pale Orange and Deep Red; early.

PEACHES

1/9 each; 18/- dozen.

IMPROVED FLAT CHINA.—Extra early; best for local use.
BEAUTY OF BOOROODABIN.—Early Freestone.
EARLY NEWINGTON.—Best all round peach; Clingstone.
MATHEW'S VICTORIA.—Good bearer; medium; Freestone.

The above sorts are all of the Chinese Strain and the only ones that will thrive along the coast.

PEACHES SUITABLE FOR COOLER PARTS:

HALE'S EARLY.—Large and medium early.
JUNE ELBERTA.—Early
MAYFLOWER.—Earliest.

WIGGIN'S.—Large Creamy Red, heavy cropper.

Please Note.—All deciduous Fruit Trees are ready to plant in May.

PLUMS

(CHICASAW)

1/9 each; 18/- dozen.

EXCELSIOR.—The best all round Black Plum.

HOWE.—Another favourite, and heavy bearer.

PLUMS, JAPANESE

1/9 each; 18/- dozen.

BEAUTY.—Large size; dark red skin; long keeper.

BURBANK.—Large globular; cherry red when ripe.

FORMOSA.—Rich yellow; turning red when ripe.

KELSEY.—Large, heart shaped; clear yellow to red.

SHIRO.—Medium light yellow Clingstone.

PEARS

For Cool Climate

1/9 each; 18/- dozen.

CHINA, OR COOKING.—Firm fruit; heavy bearer.

PACKHAM'S TRIUMPH.—Large greenish yellow; good keeper.

WINTER BARTLETT.—Large yellow; late.

Please Note.—Almonds, Apricots, Plums and Pears are unsuitable for Coast District. Apples will bear but are not much of a success.

PAPAWS

ORDINARY PAPAWS large fruit, 9d. each; 50/- per 100.

Out of pots.

NEW PINK BISEXUAL PAPAWS.—Heavy bearer; extra large fruit; starts bearing 18 inches from the ground.

All sold this Season. Ready again in December.

PERSIMMONS

2/3 each; 25/- dozen.

FLAT SEEDLESS.—Grows into big tree; heavy bearer; early.

NIGHTINGALE.—Conical fruit, dwarf tree; suitable for small garden; very early and heavy bearer.

ZENJI MARU.—Round, deep orange, egg-shaped.

AUSTRALIAN (Queensland) NUT

MACADAMIA TERNIFOLIA

Sometimes called Bauple or Bopple Nut

THINSHELLED.—In pots, 1/9 each; 18/- dozen.

QUINCES

1/9 each.

UNPROCURABLE.

MANGOES

Grown in Pots and can be transplanted any time.

PEACH.—2/- Each.

BOWEN APPLE MANGO.—Very large, stringless, and of very fine flavour. 3/6 Each.

TALCONDA PRIDE.—Another large Bowen Mango, quite stringless, and of very fine flavour, richly coloured. 3/6.

All Mangoes named are stringless.

ROSE APPLE (EUGEMA JAMBOS)

3/6 each.

A Fruit Tree new to Australia. Suitable for tropical and sub-tropical climate. Evergreen, fruit is oval or round; colour greenish white, perfumed with the odour of the rose.

—::—

ROOTED GRAPE VINES

Do not plant before July. Supplies limited.

1/- Each; 10/- Dozen; 60/- per 100.

The Railage or Postage for Grape Vines is the same as for Roses.

(See Page 5)

These are the most suitable varieties for the Coast District.

IONA.—Well known; amber colour; very sweet, soft skin.

IMPROVED ISABELLA.—Well known variety.

WILDER.—Black; good bearer; best American variety.

MONTARA.—Black Wine Grape.

EUROPEAN VARIETIES

BLACK PRINCE.—Black berries; good table sort, late

BLACK HAMBURG.—Good market sort; early.

BLACK MUSCATELLE.—Sweet table grape.

CHAUCH.—Large White; good flavour.

CERVANTES.—Good white grape, large berries.

GROS COLMAN.—Extra large Black; market variety.

MRS. PRINCE.—Black Muscat.

PURPLE CARMICHON (Ladies Finger).—Large black grape, good keeper, late.

ROYAL ASCOT.—Large Black; firm skin.

SNOWS BLACK MUSCAT.—Large berries, bunches long; fine flavour.

WHITE SYRIAN.—Early White.

MADELAINE.—White, does well on coast.

WALTHAM CROSS.—Large, amber, good table grape, good bearer.

A Pamphlet on Grape Culture may be had free on application to Department of Agriculture.

PECAN NUTS

Ready in July.

Propagated on Pecan Stock; commence bearing 4th-6th year after planting. Grafted Plants, 6/6 each, where not otherwise priced.

Deciduous trees of the Walnut family living and bearing to a great age and suitable for warm and cold climates, and when we read of individual plantations of up to 5000 acres in Texas, U.S.A., we think it should be well worth trying in any part of Australia with a reasonable rainfall. Does best in deep, rich soil with ample moisture. Make good shade and shelter trees. They are planted 40ft. to 60ft. apart. Being a very deep rooter, we advise planting the tap-root to the full depth and packing the soil around the roots as firm as you possibly can.

CASPIANA.—Nut large, strong grower.

OKLAHOMA.—Large nut with shape much like Stuart. Thin shell, heavy producer. Tree is rugged with drooping or willowy branches.

PABST.—Large, oblong, shell medium-thick; kernel plump, high quality, good flavour; prolific bearer.

SUCCESS.—Large ovate, thin shell, rich flavour; prolific.

STUART.—Large, oblong, shell thick, kernel plump, flavour good; vigorous grower, prolific; ripens early.

VAN DIEMEN.—Large, long, smooth, bright kernel, fine flavour.

WILLIAMSON.—Large oblong, plump well filled nuts.

PINEAPPLE SUCKERS

2/6 dozen; 10/- per 100; 60/- per 1000. Add 9d. for bag per 100.

SMOOTH ENGLISH.

Rough or Ryley Queen unprocurable.

GRANADILLAS

January to April

Large Fruit. 1/- each.

PASSION FRUIT

Out of ground, 3d. each; 3/- dozen; 12/6 per 100.

A valuable pamphlet on the growing of passion fruit may be had free of cost by the Department of Agriculture, in Brisbane.

COFFEE PLANTS

2/6 Each.

BRAZILIAN CHERRY

1/9 each.

GUAVA'S

CHERRY GUAVA 1/9 each.

MONSTERIA DELICIOSA

2/6 Each

A strong stemmed climbing plant for frost, free position, fruit long and thin, of a delicious flavour, very long leaves, plant in moist shady position.

STRAWBERRY PLANTS

A LIMITED SUPPLY AVAILABLE.

March, April or May is the best time for Planting.

1/6 for 25 plants; 5/- per 100.

HEDGE PLANTS

3/6 doz; 20/- per 100. Plant 15 ins. apart.

LIGUSTRIUM.—Privet, fine and broad leaf variety, evergreen and very hardy.

BOUGAINVILLEA.—Improved Trailli; plant 6 ft. apart.

20/- dozen.

HIBISCUS.—Rose Scott; plant 3 ft. apart. 18/- doz.

LLANTANA.—Plant 2ft. apart. 12/- doz.

RHUBARB

9d. Each; 7/6 Dozen

UNPROCURABLE.

Decorative Dahlias.

—:o:—

Decoratives vary in formation from those with close, overlapping petals to those of loose formation with broad petals incurving, or long curling or twisted petals, and in size range from blooms 2 inches across to a foot.

"L" denotes large-sized flowers; "M" medium; and "S" small.

PRICES.—Except where priced, 1/6 each.

ANNA BENEDICT (L).—Deep red, well-formed on excellent stems

BABY ROSE (M).—Pure pink with a silvery glow; long strong stems. 2/-.

BARNSTEEN (M).—Amber with bronze centre; bronze reverse.

CLARA CARDER (L).—A beautiful shade of Cyclamen pink.

C.P. (L).—Bright copper suffused rosy-red; hugs flowers.

DREAMTHORPE (S).—Brilliant tango shaded primrose, with a coppery gold centre, petals wavy and curling.

EDITH CARTWRIGHT (S).—Intense scarlet, heavily shaded crimson, rather long rounded petals; best small-flowered dark red.

GOLDEN SWEEPSTAKE (L).—Golden yellow with apricot centre florets wavy and incurved, growing backwards towards the stem.

GOLD ROSE (M).—Rose pink with golden sheen; beautiful for cutting.

GRACE DOUGLAS (M).—Bright rose, deeper towards the centre and lighter at the end of petals; good stem, free flowering. 2/-.

MERRY WIDOW (M).—Rose-pink, tipped canary; good shape.

NANCY GENE (L).—Deep bright yellow; excellent form.

PINK CHAMPION (L).—Beautiful pink, well-formed flowers.

RICHARD KLIMPT (L).—Bright scarlet, or coppery orange red; a real giant, easy and free grower. 2/-.

XANTHIC (L).—Brilliant citron yellow; good centre and extra strong stems.

CACTUS & HYBRID OR GARDEN CACTUS DAHLIAS

(INCLUDING NEW VARIETIES)

Hybrid or Garden Cactus are varieties with tubular petals varying in length and thickness. They differ from those known as Exhibition Cactus in length and size of petals, those of the latter being longer and thinner. The majority of the exhibition types have weak stems, although we now offer several of the thin-petalled cactus with excellent stems. The Hybrid Cactus share with Decoratives the popular favour of the general public.

"L" denotes large-sized flower; "M" medium; "S" small.

CONSUL-GENERAL QUIST (L).—Soft rose, darker towards centre; well formed, enormous Garden Cactus, edge of petals elegantly undulating, giving the flower a lovely appearance.

CYRIL VERSCHAEVE (L).—Glowing wine-red, elegantly formed

DAINTY BESS (M).—Deep mauve pink to pale pink at tips; a striking new variety. 2/6.

DAYDREAM (M).—Creamy white, flushed heliotrope at the tips; an exceptionally dainty colouring, quite out of the ordinary. 2/6.

DR. VERHAGE (L).—Pomegranate red, tinted amber-orange.

ELEGANCE PINK (M).—Deep rose with a brighter centre; true semi-cactus; long, wiry stems and free flowering.

FENOMEN (M).—Rich ivory white, extremely free-flowering.

GOLDEN STANDARD (L).—Golden tan flushed with tints of amber and bronze; vigorous and profuse bloomer.

GRETEL (L).—Pure orange; a larger Miss Belgium, deeper in colour.

LADY HUNTINGFIELD (M).—Pink shaded salmon, on a yellow base; suitable for garden cutting or exhibition.

MDE. C. JUSSIANT (M).—Pure lilac, well formed flowers. Excellent cutting type; best in this colour. 2/-

MEVR. WYKHUIZEN (L).—Brilliant fiery red, velvety-black centre.

NEW GLORY (L).—Deep blood red, tipped white.

ORLANDO (M).—Yellow suffused salmon pink. 2/6.

PLAY OF THE FLAMES (M).—Orange flushed crimson scarlet; good cutting type.

SAARLANDS HEIMKEHR (L).—Salmon-red with amethyst centre, flushed gold. A unique colour; florets are finely pointed.

SALMON GIANT (L).—Salmon flushed deep yellow; twisted petals.

SCARLET LEADER (L).—Intense poppy-red, medium height on excellent stems, fine for garden and exhibition.

SUZETTE FINCHAM (M).—Coppery apricot with golden tips; specially fine either for cutting or garden effect.

WINIFRED CALLAWAY (M).—Golden amber, with narrow petals

JAPANESE CHRYSANTHEMUMS

1/- each; 10/- doz. Ready in September.

AUTUMN TINTS.—Salmon Buff, Creamy reverse.
APOLLA.—Incurved Yellow.
CORONATION AMARANTH.—Incurved Rosy Amaranth.
CORONATION PINK.—Pink reflexed.
DAME SARAH LEES.—Deep Pink reflexed.
DR. I. M. INGLIS.—Purple Silver reverse.
EDITH CAVELL.—Orange Bronze.
H. L. ASKEY.—Terracotta Gold reverse.
HELENA POCKETT.—White Incurving petals.
LADY DUGAN.—Helitrope Incurving broad petals.
LADY E. MILLER.—Deep Yellow Incurved.
LADY SWANSON.—White Incurved.
LEICESTER.—Bright Chestnut Bronze Incurved.
MRS. E. ALSTON.—Pure Yellow Sport from Autumn Tints.
MRS. H. HABGOOD.—Salmon shaded Apricot.
MRS. J. L. REUTER.—White reflex.
MRS. ROGER THOMPSON.—Buttercup Yellow.
MRS. RUSSELL CLARKE.—Golden Amber Incurved.
MRS. T. CARRINGTON.—Cerise Pink.
MRS. W. A. REID.—Fiery Crimson.
PINK POCKETT.—Silvery Pink.
POCKETT'S CRIMSON.—Crimson.
POLLY FLITTON.—Beautiful Golden Bronze.
REMUS.—Deep Rose Silvery reverse.
REVEILLE.—Golden Apricot Medium height.
SIR ROBERT KNOX.—Golden Yellow, long broad incurving petals.
SOUVENIR D. MARTIN.—Crimson Gold reverse.
SYLVIA GREEN.—Large Mauve reflex.
VANGUARD.—Mauve Purple Silvery reverse.
W. MILLAR.—Rosy Amaranth Silvery reverse.

Gladioli

— GLADIOLI NAMED VARIETIES. —

UNPROCURABLE.

If supplies come to hand we will issue a special list.

MISCELLANEOUS BULBS AND TUBERS

—::—

- AGAPANTHUS UMBELLATA.**—African Lily; Blue and white; grows in the open sun. 1/3 each.

LATANIA BURBONICA.

Fan Palms, suitable for outdoor or indoor. Large and showy.
2/6, 3/6 each.

PHOENIX CANARIENSIS

Outdoor Palm, bushy habit, 2/6

PHOENIX ROEBELLINI

A Fine Leaved Palm, similar to *Cocos Weddeliana*, but hardier for table or outdoors, suitable for small garden; very pretty. This is one of the finest Palms. Highly recommended

1/6, 2/-, 2/6, 3/6.

A FEW HINTS ON THE CARE OF PALMS IN THE HOUSE

Table Palms are so easily grown and kept in the house, that no home should be without a plant or two, yet many people lose their Palms in a few short months, and very often the nurseryman gets the blame, when, as a rule, improper management is the cause of failure. Table Palms are lost either through lack of water, too much water, or the ravages of Scale.

First of all see that your Palm is placed where there is no draught and have as much light as possible, but never in the glaring sun. Every opportunity should be availed of to place the Palms for a spell in the open air in a shady and protected place, especially during rain or in the night, as the dew refreshes them.

Watering Palms.—The best way is to take a bucket of water and immerse the whole pot for a quarter hour twice or three times a week in the summer and less in the winter. Never let the pot stand in a saucer of water.

Scale is the most injurious pest attacking a Palm. To keep them free of this, wash the leaves on both sides at least once a fortnight with water and Sunlight Soap. This will destroy any Scale and at the same time remove dust and keep the pores open. Palms should not be kept in a room where gas is burning.

FLOWERING PEACHES

2/- each.

Ornamental and Flowering Shrubs

The value of Shrubs for the garden is becoming more and more recognised. When once established they require little attention. Not only do they give variety to the garden, but are often the only plants that are in flower during a dry spell when water gets scarce.

All shrubs are grown in pots and can therefore be transplanted at any time.

When planting do not disentangle the roots, but plant as they have been in the pot; place a few inches below soil level, trample on well and water well. A mulching of some material will prevent evaporation.

The following list is most suitable for the Queensland climate:

ABUTILON CHINESE LANTERN.—Well known flowering Shrubs.
1/9 each.

ACACIA BAILEYANA (Cootamundra Wattle).—Silver Leaved, 2/-.
15 feet.

ACACIA PODALYRAEFOLIA.—Queensland Silver Wattle, 2/- 15
feet.

30. C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

ACALYPHA.—Variegated foliage plants in all shades, 1/9, 5 to 10 feet.

ADHATODA.—Tail Shrub grown for the foliage effect, white flowers, purple markings. 2/- each.

ALLAMANDA HENDERSONI.—Large yellow flowers, glossy foliage. 2/- each.

ARDISIA CRENULATA.—Bearing Scarlet Berries, 1½ feet, 1/9.

AZALIAS.—Assorted Colours, 2/6.

For Bush-house or shady place; very pretty.

BOOKLEAF PINES.—See under Thuya.

BAUHINIA.—A beautiful flowering tree about 15 feet high, suitable for garden and street planting.

BUDLEYA VEITCHIANA.—Sprays of lilac flowers, 12 feet, 2/-.

CHRISTMAS BUSH.—See Ceratopetalum.

CAMELIAS.—In sort, 3/6d. 5 ft.

CASSIA FISTULA.—Large racemen of yellow flowers, very prolific. 2/-.

(CASCARA)

CASSIA CONDOLLEANA.—Profuse yellow blooms. 2/-.

CASSIA CUNNINGHAMI.—Rosy red, small leaves. 2/6.

CASSIA SIAMAEA.—Huge spikes of yellow flowers. Hardy. 2/6.

CESTRUM NOCTURNUM.—Small yellow flowers, with a strong scent at night time, 1/9 6 feet.

CERATOPETALUM GUMMIFERUM.—Christmas bush of New South Wales. 2/-.

CHAMELAUCIUM UNICATUM (The GERALTON Wax Plant).—Ever-green. Unprocurable.

CROTONS.—Assorted colours. Large assortment. From 2/-.

CROTLARIA LABURNIFOLIA.—Producing spikes of greenish yellow blooms, resembling small birds. 2/- Each.

CUPHEA JORRULENSIS.—Yellow and red flowers, 1/9. 3 feet. Hardy.

DEUTZIA CRENATA.—Double White, 6 feet, 1/6.

DRACENA.—Beautiful foliage shrubs, hardy, different colours. 2/-.

ERITHRINA CHRISTA GALLI.—8ft, 10ft, deep scarlet. 2/-.

ERITHINA VESPITELLI.—Leaves in the form of Maltese Cross, flowers red and yellow. 2/-.

FRANGIPANNI.—See Plumeria.

GARDENIA GLOBOSA.—White, strongly scented, dark green foliage, 2/- Each.

GARDENIA MAGNIFICA.—large, scented flowers, 2/-.

GERALTON WAX PLANT.—See Chamaelaucium. Unprocurable.

HABROTHAMNUS ELEGANS.—Carmine; nearly always in flower; flowers resemble Bouvardias, 2/-.

HELIOTROPIUM AUREUM.—Blue, beautiful perfume. 1/3.

HIBISCUS.—ANDERSONI.—Carmine, dark eye, 1/9.

AUREOLE.—Golden Apricot, suffused pink, rosy carmine eye, 1/9.

CONQUEROR.—Buff yellow, crimson base, 1/9.

FUCHSIOIDES.—Curious and drooping bloom, 1/9.

GLORIA.—Chinese, orange and veined matter lake, 1/9.

ISLAND EMPRESS.—Deep pink, double, grand colour and blooms, 1/9.

- ISLAND QUEEN.—Pink, fine colour, 1/9.
 ROSE SCOTT.—Light red, very showy, 1/9.
 LAMBERTI.—Double red, 1/9.
 MADELINE CHAMPIGNON.—Rich apricot, with deep strawberry red eye, 1/9.
 TANGO QUEEN.—Coppery shade; darker than Conqueror, 1/9.
 PACIFICUS CREAM.—Dark eye, 1/9.
 PEACH BLOW.—Deep salmon pink, double and free, 1/9.
 DOUBLE APRICOT.—1/9.
 DOUBLE WHITE.—1/9.
 SINGLE LAVENDER.—1/9.
 WILDERS WHITE.—A large single white, 1/9.
HOLMSKIOLDIA SANGUINEA.—Bearing peculiar brick red flowers in Winter, 2/-.
HYDRANGEAS.—White, Blue and Pink. For shady, moist position. 1/9 each. To improve colour, use lime for pink, sulphate of iron for blue varieties.
LAGERSTROEMIA (So called Pride of India).—For coast or inland.
 ALBA.—White, 2/-.
 INDICA.—Red, 2/-.
 EARESII.—Mauve, 2/-.
 HELITROPE BEAUTY.—2/-.
 FLOS REGINA.—Bright pink. 2/-.
LASIANDRA MACRANTHA.—Bears a profusion of purple flowers 1/9; 5 feet.
LANTANA.—These showy shrubs are non-spreading, splendid flowering shrubs, 1/3 each, 12/- dozen.
 ALBA.—White
 CHELSEA GEM.—Crimson, suffused orange, always in bloom
 DRAP DE OR.—Yellow.
 SELLOWIANA.—Mauve, training variety.
 GOLIATH.—Orange and red variety.
 MAGENTA QUEEN.—Rich magenta.
MAGNOLIA FUSCATA.—Portwine Magnolia; evergreen, 2/6.
MOSHOSMA RIPARIA (Musk).—Producing masses of feathery mauve blooms. 2/-.
MURRAYA EXOTICA.—White, scented flower; evergreen; often called Box Tree, 2/-; for coastal districts.
MUSEANDRA FRONDOSA.—Orange flower, backed by a white leaf; striking appearance; strong grower, 2/-. Frost free position.
NANDINA DOMESTICA.—The Sacred Bamboo of Japan; white flowers in Spring; graceful foliage, 2/-.
NERIUM-OLEANDER.—For wet or dry positions.
 DR. GOLFIN.—Deep rosy red; single, 2/-.
 MADONNA.—Large semi-double white, 2/-.
 MADAME MELAGUIER.—Single, light pink. 2/-.
 MRS. F. ROEDING.—Semi-double Salmon. 2/-.
 SPLENDENS.—Large double, pink. 2/-.
PLUMERIA ACUTIFOLIA (Frangipanni).—Beautiful Shrub, grows 15 feet high; creamy white flower; strongly scented, 1/9. pink, 2/6.
POINCIANA GILISII.—Bird of Paradise flower. Yellow and Red. 10 feet. 2/-.

32. C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

POINSETTIA PULCHERRIMA.—A very showy Scarlet; flowers in Spring, 1/9; 10 feet.

CREAM.—2/-.

POMEGRANATE.—Beautiful scarlet flowers which resemble Carnation, 2/-.

RAPHIOLEPSIS INDICA.—White; hardy evergreen shrub; dwarf, 2/-.

RONDELETIA AMOENA.—A beautiful Shrub, with heads of salmon flowers. 2/9.

RUSSELLIA JUNCEA.—Four feet; attractive, free flowering plant, 1/9. 4 feet.

SPIREA GRANDIFLORA.—Double, May. 1/9. 6 ft. everywhere.

TABERNAEMONTANA COMASSA.—White, Gardenia-like flowers; evergreen; compact shrub, 1/9; 6 ft.

TAMARIX.—Flowering Cypress.

JAPONICIA PLUMOSA.—Feathery pale pink. 2/-.

TECOMA STANS.—Yellow flowers; in large clusters; 15 ft., 1/9.

TECOMA SMITHII.—Orange yellow. 1/9.

TOXICOPHLEA SPECTABILIS.—Handsome shrub, with attractive foliage, 2/- 6 feet.

TREE FERNS.—2/6 each.

VITEX VARIEGATA.—Foliage plant, narrow leaves, 2/-.

SHADE AND ORNAMENTAL TREES

ARAUCARIA EXCELSIS.—Norfolk Island Pine, 50 feet. 2/-, 2/6, 3/6.

BRACHYCHITON ACERIFOLIO.—Flame Tree, with handsome foliage; producing a perfect blaze of scarlet flowers, 50 feet, 2/-.

CAMPORA OFFICINALIS.—Camphor Laurel. 2/-.

FICUS BENJAMINI.—Weeping Fig. 2/6.

FICUS NITIDA.—A fine Fig; evergreen; for street planting, 2/6.

JACARANDA MIMOSIFOLIA.—Blue flowering tree, 1/9 each; 18/- dozen.

POINCIANA REGIA.—2/- each;

SHINUS MOLLIS.—Pepper Tree, 2/-.

CONIFERS AND TAXADS

—:o:—

(Evergreen Trees of the Pine, Spruce and Cypress kind)

ARAUCARIA EXCELSA.—Norfolk Island Pine. 2/-, 2/6, 3/6, ea.

CUPRESSUS ARIZONICA.—Silver green foliage, does well in Q'd, very pretty. 2/9 each.

CUPRESSUS HORIZON TALIS AUREA.—(Golden Cypress)—Unprocurable.

CUPRESSUS SEMPERVIRENS STRICTA.—Pencil Pine. 2/6.

CUPRESSUS ALLUMI.—Erect pyramidal form, with decided bluish colour. 3/6.

JUNIPERUS VIRGINIANA.—(Red cedar), handsome tree, nar-

JUNIPERUS AFRICANA.—A dwarf globular variety. 2/6.
tive foliage. 2/-, 2/6 each.

TWINING & CLIMBING PLANTS

—:o:—

ALAMANDA SHOTTI.—Large yellow flowers; glossy foliage. 2/-.

ANTIGONUN LEPTOPUS.—Large cluster of Pink flowers; very pretty. 1/9.

BEAUMONTIA GRANDIFLORA.—Large White, trumpet-like flowers. 2/-.

BIGNONIA CHERERE.—Evergreen, large Scarlet flowers. 2/-.

GRANDIFLORA.—Large head of Orange; flowers in Summer. 2/6 Each.

JASMINOIDES ALBA.—Pure White, glossy foliage. A beautiful variety. 2/-.

LINDLEYANA.—Lilac. 2/-.

ROSEA.—Large trusses of light rose flowers. 2/-.

VENUSTA.—Orange; flowers in Winter. 1/9.

BOUGAINVILLEA.—

IMPROVED GLABA.—Magenta. 2/-.

IMPROVED MAGNIFICA TRAILLI.—Purple. 2/-.

BOISDE ROSE.—Biscuit colour. 3/-.

LATERITA.—Brickred. 3/6 each.

MRS. BUTT.—Crimson Lake. 2/6 each.

THOMASII.—The best pink. 2/6 each.

TURLEY'S SPECIAL. 3/-.

FICUS STIPULATA.—Climbing Fig; adheres to bricks and unpainted wood naturally. 1/9 each.

HONEYSUCKLE.—See under *Loincera*.

34. C. LANGBECKER & SONS, Rose & Fruit Tree Specialists.

- IPOMAEA HORSFALLI**—Undoubtly the finest creeper in existence, flowers are trumpet shaped of dark red velvety colour dark green foliage; will not stand frost. 3/6 each, scarce.
JASMINUM (JASMINE) GRANDIFLORUM.—White; evergreen. 2/-
LONICERA MULTIFLORA.—Honeysuckle yellow. 1/9.
QUISQUALIS INDICA.—Flowers vary from Orange to Red and Pink on the same plant. 2/-.
RHYNCOSPERNUM JASMINOIDES.—White star-shaped flowers, perfumed; small evergreen leaves. 2/-.
SOLANDRA NITIDA.—A very rare and beautiful climber; flowers deep yellow, one foot long. For frost-free position. 2/-.
STEPHANOTIS FLORIBUNDA (E).—White scented, 2/-.
WISTERIA SINENSIS.—Lavender 2/-.

—:o:—

CALADIUM BULBS

Beautifully coloured and marked foliage plants. Plant October-November, in a shady and protected position.

BULBS—1/6; 2/-; 2/6 each.

— SPECIAL 3/6 each. —

BUSH HOUSE PLANTS

- ASPARAGUS FERNS**.—1/6.
COLEUS—6d. each.
NEPHROLEPIS.—1/6 and 2/-.
LYCOPODIUM.—
 MARTINI.—2/- each.
 METALLICA.—2/- each.
GYNURA.—Pretty foliage plant. 1/9.
MILITARY FERN.—1/9.
ADIANTHIUS FERNS.—Unprocurable.

ANNUALS IN SEASON

—:o:—

- ASTERS**.—Crego and Tasmanian branching. From July. 6d. doz
CANDYTUFT.—6d. doz. Autumn and Winter.
CALENDULA.—6d. dozen, mixed.
CARNATION.—Marguerite. 6d. doz. Most of the year. Very scarce.
CARNATION.—Malmaison. 1/- doz. Most of year. Very scarce.

CARNATION.—Infant of Niece. 2/6 doz. Very scarce.
CLARKIA.—Double Mixed, 6d. doz. Autumn and Winter.
CINERARIAS.—1/6 doz. March till May. Outdoor strain.
CENTAUREA—CORNFLOWER—Mixed. 6d. doz. Autumn and Winter.
DELPHINIUM.—Gold Medal Mixture. 1/6 doz.
DIANTHUS.—Double; fine mixed. 6d. doz. Most of the year.
GODETIA.—6d. doz. Autumn and Winter.
LUPINS.—Mixed. 6d. doz. Autumn and Winter.
LARKSPUR.—Mixed. 6d. doz. Autumn and Winter.
LEPTYOSYNE.—6d. doz. Autumn and Winter.
PANSY.—Seed unprocurable.
PHLOX DRUMMONDI.—6d. doz. All the year round. Scarce.
SALPIGLOSSIS.—6d. doz. March to November.
SNAPDRAGON.—Giant Mixed. 6d. doz.
STOCKS.—Giant; Niece 9d. doz. Autumn.
SALVIA.—Bonfire, 3d. each; 2/6 doz., out of ground; 6d. each out of pots.
STATICE.—6d.
VERBENA.—Mixed. 1/- doz.
ZINNIA.—6d. doz. Spring and Summer.

RUSSELL LUPINES

• • •

Flower spikes commence at bottom
of stalk and all the way up.

1/3 dozen.

GERBERA SEEDLINGS

3/6 per dozen.

Flowering Plants: 6d. each; 5/6 dozen; Thousand, price

on application.

Exhibition Strain—1/- each, 10/- doz.

— UNPROCURABLE —

CARNATION.—Marguerite.
CARNATION.—Infant of Niece.
CARNATION.—Malmaison.

CULINARY PLANTS

—:0:—

CABBAGE PLANTS.—Succession, large flat; St. John's Day, small round; Glory of Enkhuizen, large round; Early Drumhead; 6d. bundle of 25; or 1/9 per 100; 17/6 per 1000.

CAULIFLOWER.—Eclipse; 9d. bundle of 25; 2/6 per 100.

BEETROOT.—Turnip Rooted; 6d. bundle of 25.

KOHLRABI.—6d. bundle of 25. Autumn.

LETTUCE.—Iceberg; 6d. bundle of 25.

TOMATO PLANTS.—6d. dozen; 2/- per 100; 17/6 per 1000.

SAGE, THYME, MAJORAM.—6d. dozen; in pots 6d. each.

PARSLEY.—6d. dozen.

ROSELLAS.—1/- dozen. Ready in Spring.

RHUBARB.—UNPROCURABLE
